Introduction

This *Installation Guide* is written for a Proxense authorized installation professional. Only a Proxense authorized installation professional may configure and provisioning this product.

There are three steps to the installation:

- Before you start
- Configuring the ProxTag
- Provisioning the ProxTag

Step 1: Before you start

To ensure that you have the most recent version of this guide, be sure to check our FTP site before you start the installation.

Package Contents

Your package includes the following items:

- This Guide (Your package maybe part of a master pack where only one copy of this guide will be provided.)
- One ProxTag

Minimum Requirements

- ProxNet installation site survey which lists the following:
    a. Asset information
    b. Asset type

Step 2: Configuring the ProxTag

a. Power On the ProxTag by pressing the power button.

b. Run the ProxAdmin executable from either a network share or local drive of the client.

c. Click the **Prox tags** tab.

d. Click the **Add tag** button to add new tag. Enter the Prox tag ID number. Press **OK** button.

Step 3: Provisioning the ProxTag

Please contact the system administrator who must now provision the ProxTag.
